PRODUCT BULLETIN

T.F. 405

MASTERPIECE WOOD STAIN

Description: An oil based timber stain designed for application to interior and exterior timbers.

Properties: Easy application, fast drying stain which requires recoating with clear varnish.

Uses: Enhances natural colour of timbers and provides new timber tones to whitewood and man made timbers such as particle board and M.D.F. Not recommended over previously painted surfaces.

Surface Preparation: All surfaces must be clean and free from wax, oil, grease and other contaminants. Fill cracks and holes with appropriate filler, allow to dry and sand smooth. Dust all areas prior to application.

Thinning: Not usually required. The addition of mineral turps will spread the stain further, thereby lightening the colours.

Application: Test the colours on an offcut or section that does not show. Colour strength may be diluted by thinning with mineral turpentine or increased by applying additional coats. Brush or spray. May also be rubbed on with absorbent cloth pad. Remove excess stain with a clean cloth.

Woodstain is not recommended to be used over previously painted surfaces. Woodstain must be over coated with Masterpiece Varnish to protect and enhance the finish.

Spread Rate: Up to 14 m² per litre depending on the porosity of the timber.

Drying Time: Touch dry in approximately 3 hours & recoat after 16 hours.

Clean-Up: With mineral turps.

Standard Packaging: 1L 500 ml

Colour: Jarrah, Baltic Pine, Teak, Mahogany, Oak, Walnut.
