### STERISEAL 8000

**Description:** Water based clear sealer to seal cement roof tiles and general masonry.

**Properties:** Clear sealer, easy to apply, to seal cement roof tiles with the added benefit of added fungicides to act as a sterilising agent, to help eliminate unwanted mould spore.

**Uses:** As a clear sealer and weatherproofing sealer on cement roof tiles and general masonry, before over coating with a coloured Roof Coat

**Surface Preparation:** All surfaces should be clean & free from dirt, dust, oil, grease, mould & other contaminants. Efflorescence or mould should be treated with the appropriate sterilizing wash.

Water blast masonry surfaces if necessary to remove contaminants. And allowed to dry thoroughly

**Thinning:** Not generally required. For spray application may be thinned with water up to 5%.

**Application:** Brush, spray or roller. Apply one or preferably two coats for best performance. Do not apply when atmospheric conditions or surface is at or likely to be about 10°C during the application and drying process.

**Spread Rate:** Approximately 12m<sup>2</sup> per litre depending on the porosity of the surface.

**Drying Time:** At 25°C touch dry in 20 – 30 minutes. Recoat after 4 – 6 hours. Allow longer times in cold or damp conditions.

**Clean-Up:** Clean up equipment immediately after use with water.

**Standard Packaging:** 20L

**Colour:** Clear.
